SUSANNE STEMMER

is n Austrian photographer based in Paris.

Specialised in underwater photography, the artist Susanne Stemmer examines the changes that human beings experience after their immersion through the surface. The characters illustrated in her works are free and boundless as soon as they immerse. A physical freedom with the imaginary loss of gravity as well as mental freedom, abandoning their image they have in society, having the feeling nobody is watching them – finally being able to release themselves from all conventions and drop the mask they are wearing in society. An inner journey begins into a world we rediscover ourselves, an invented world, photographed and still resembling to be an imaginary painting.
